

COOLSCULPTING® VS EMERALD LASER™

Effectiveness - Emerald Laser™ is cleared by the FDA to reduce fat.
CoolSculpting® is only cleared to treat the appearance of fat.

Proven Studies - CoolSculpting® has no placebo-controlled studies.
Emerald Laser™ has been proven effective in double-blind placebo-controlled studies. (Gold standard for medical devices)

Results - Emerald Laser™ trims significantly more inches in less time than CoolSculpting®.

Health & Safety - Unlike CoolSculpting®, Emerald Laser™ does **not** kill or harm fat cells and has no reported side effects.
